

December 18, 2007

Clerk, U.S. Bankruptcy Court

Below is an Opinion of the Court.

RANDALL L. DUNN
U.S. Bankruptcy Judge

UNITED STATES BANKRUPTCY COURT
FOR THE DISTRICT OF OREGON

In Re:) Bankruptcy Case
Michael Lloyd Johnson and) No. 07-31717-rld13
Jennifer Dawn Johnson,)
Debtors.) MEMORANDUM OPINION

The issue before me requires that I plunge further into the semantic briarpatch generally referred to as the Hanging Paragraph, added to § 1325(a) of the Bankruptcy Code by the Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 ("BAPCPA").¹ Specifically, I must decide whether a creditor holds a purchase money security interest ("PMSI") for purposes of the Hanging Paragraph, where a portion of its

¹Unless otherwise indicated, all chapter, section and rule references are to the Bankruptcy Code, §§ 101-1532, and to the Federal Rules of Bankruptcy Procedure, Rules 1001-9036, as enacted and promulgated as of October 17, 2005, the effective date of most of the provisions of BAPCPA (Pub. L. 109-8, April 20, 2005, 119 Stat. 23).

1 debt represents financing of negative equity² in a vehicle traded in by
2 the debtors at the time the debtors purchased their new car.

3
4 BACKGROUND

5 On January 4, 2006, Michael and Jennifer Johnson ("the
6 Johnsons") purchased a 2005 Chrysler Sebring ("Vehicle") from Gresham
7 Chrysler Jeep, Inc. ("Dealer"). Daimler Chrysler Services Americas LLC
8 ("DaimlerChrysler") financed the purchase of the Vehicle. The amount
9 financed was \$26,078, an amount which the parties agree included \$8,990
10 in negative equity in the 2003 Chevrolet Cavalier ("Trade In") that the
11 Johnsons traded in as part of the transaction in purchasing the Vehicle.

12 The Johnsons filed their voluntary petition for relief under
13 chapter 13 of the Bankruptcy Code on May 1, 2007 ("Petition Date"), a
14 date within the 910-day period after their purchase of the Vehicle. As
15 set forth in the proof of claim ("Claim") filed by DaimlerChrysler, to
16 which the Johnsons have not objected, the Johnsons owed DaimlerChrysler
17 \$24,869.06³ as of the Petition Date in connection with DaimlerChrysler's
18 financing. In their chapter 13 plan dated May 4, 2007 ("Plan"), the

19 _____
20 ²"Negative equity is the amount by which the outstanding loan
21 balance exceeds the value of the trade-in vehicle." In re Lavigne, No.
07-30192, 2007 WL 3469454 at *1 n.1 (Bankr. E.D. Va. Nov. 14, 2007).

22 ³In its Memorandum in Support of DaimlerChrysler's Objection to
23 Confirmation, DaimlerChrysler states that the total amount financed was
24 \$26,975 and that the current debt is \$25,191.81. DaimlerChrysler's
25 Claim, supported by a copy of the Retail Installment Contract, reflects
26 the amount financed as \$26,078. The Claim further reflects the amount of
the debt as of the Petition Date as \$24,869.06. It is this amount that
DaimlerChrysler contends should be treated as a secured claim under the
Plan.

1 Johnsons propose to treat \$13,800 of the Claim as secured, and the
2 balance of the Claim as unsecured. The Plan estimates that unsecured
3 creditors will receive an approximate 40% distribution on their claims.

4 DaimlerChrysler contends that its finance of the negative
5 equity in the Trade In constitutes "value given to enable the [Johnsons]
6 to acquire rights in or the use of the [Vehicle]." Accordingly,
7 DaimlerChrysler objects to the Plan on the basis that because it holds a
8 PMSI in the Vehicle, purchased by the Johnsons within 910 days preceding
9 the Petition Date for their personal use, the Hanging Paragraph prevents
10 the Johnsons from using § 506 to bifurcate the Claim into secured and
11 unsecured components. DaimlerChrysler asserts that the Plan must provide
12 for the payment of the Claim in the amount filed, i.e., \$24,869.06, in
13 equal monthly installments. The Johnsons counter that DaimlerChrysler's
14 financing of negative equity does not constitute a purchase money
15 obligation, and therefore cannot give rise to a PMSI. It is their
16 position that because DaimlerChrysler does not hold a PMSI in connection
17 with that portion of the Claim relating to the finance of negative
18 equity, DaimlerChrysler is not entitled to the protection afforded by the
19 Hanging Paragraph.

20 On October 18, 2007, I heard argument on DaimlerChrysler's
21 objection to confirmation of the Plan, after which I took the matter
22 under submission. This Memorandum Opinion constitutes my findings of
23 fact and conclusions of law, which I make pursuant to Fed. R. Civ. P.
24 52(a), applicable in this contested matter pursuant to Fed. R. Bankr. P.
25 9014. I have core jurisdiction to resolve plan confirmation issues
26 pursuant to 28 U.S.C. §§ 1334(b), 157(a), 157(b)(1), and 157(b)(2)(L).

1 DISCUSSION

2 A. Treatment of DaimlerChrysler's Claim Under the Plan.

3 In order to have the Plan confirmed, the Johnsons must provide
4 one of three alternative treatments with respect to any allowed secured
5 claim of DaimlerChrysler: (1) DaimlerChrysler must consent to its
6 treatment under the Plan; (2) the Johnsons may retain the Vehicle and
7 provide a stream of payments to DaimlerChrysler; or (3) the Johnsons must
8 surrender the Vehicle to DaimlerChrysler. See § 1325(a)(5). Because the
9 Johnsons have elected to retain the Vehicle, and to provide
10 DaimlerChrysler with a stream of payments, § 1325(a)(5)(B) requires,
11 among other things, that the Plan distribute to DaimlerChrysler the
12 present value of its allowed secured claim as of the Petition Date, and
13 provide for equal monthly payments in an amount sufficient to provide
14 adequate protection to DaimlerChrysler.

15 DaimlerChrysler contends it has additional rights with respect
16 to its treatment under the Plan; under the Hanging Paragraph,
17 DaimlerChrysler asserts the present value of its allowed secured claim
18 must be the full amount of its debt, i.e., the amount of the Claim, as of
19 the Petition Date.

20 Effective in cases filed on or after October 17, 2005, BAPCPA
21 added the Hanging Paragraph to § 1325(a). As relevant to the matter
22 before me, the Hanging Paragraph provides:

23 For purposes of paragraph [1325(a)](5), section 506 shall not
24 apply to a claim described in that paragraph if the creditor
25 has a purchase money security interest securing the debt that
26 is the subject of the claim, the debt was incurred within the
910-day [period] preceding the date of the filing of the
petition, and the collateral for that debt consists of a motor
vehicle (as defined in section 30102 of title 49) acquired for

1 the personal use of the debtor. . . .

2 The Hanging Paragraph has been the subject of substantial
3 litigation and disputes regarding its interpretation. It is now settled
4 in this circuit, through decisions of the Bankruptcy Appellate Panel,⁴
5 that the Hanging Paragraph applies to § 1325(a)(5) to preclude debtors
6 from using cramdown⁵ of a secured claim with respect to a vehicle
7 purchased within 910 days prior to a bankruptcy petition, provided that
8 the secured creditor's claim satisfies the criteria set by the Hanging
9 Paragraph. To fall within the protection of the Hanging Paragraph, the
10 secured claim must meet the following conditions:

11 The creditor must have a purchase-money security interest; and
12 The purchase-money security interest must secure the debt that
13 is the subject of the claim; and
14 That debt must be incurred no more than 910 days before the
15 date of the debtor's filing; and
16 The collateral for the debt must be a "motor vehicle"; and
17 That motor vehicle must have been acquired for the personal use
18 of the debtor.

19 In re Trejos, 352 B.R. 249, 264 (Bankr. D. Nev. 2006).

20 The only issue in the dispute before me is whether
21 DaimlerChrysler has a PMSI in the Vehicle. The issue arises because the
22 financing which forms the basis of the Claim includes funds provided both
23 for the Johnsons' purchase of the Vehicle and for payoff of the Johnsons'
24 negative equity in the Trade In.

25 ⁴See Wells Fargo Financial Acceptance v. Rodriguez (In re
26 Rodriguez), 375 B.R. 535 (9th Cir. BAP 2007); Trejos v. VW Credit, Inc.
(In re Trejos), 374 B.R. 210 (9th Cir. BAP 2007).

⁵For a brief explanation of the concept of cramdown and its
operation, see In re Sanders, No. 07-50783-C, 2007 WL 3047233 at *4-5
(Bankr. W.D. Tex. Oct. 18, 2007).

1 B. Whether a PMSI Exists is Determined By State Law.

2 The Bankruptcy Code does not define the term "purchase money
3 security interest." It is lifted from the Uniform Commercial Code
4 ("UCC"), which has been enacted with variations among the states as state
5 code law.

6 At least one bankruptcy court has suggested that a uniform
7 federal definition or interpretation of "purchase money security
8 interest" should be developed and applied. See In re Westfall, 365 B.R.
9 755, 759 n.4 (Bankr. N.D. Ohio 2007) ("Westfall I"), with further
10 elaboration in In re Westfall, 376 B.R. 210, 212-20 (Bankr. N.D. Ohio
11 2007) ("Westfall II"). In addition, Official Comment 8 to § 9-103 of the
12 UCC ("Official Comment 8"), promulgated pre-BAPCPA, indicates that usage
13 of the term "purchase money security interest" under Article 9 of the UCC
14 is not meant to preempt the definition or characterization of the term
15 under other statutes, including the Bankruptcy Code.⁶

16
17 ⁶Official Comment 8 states:

18 . . . This section addresses only whether a security interest
19 is a "purchase-money security interest" under this Article . .
20 . In particular, its adoption of the dual-status rule,
21 allocation of property rules, and burden of proof standards for
22 non-consumer-goods transactions is not intended to affect or
23 influence characterizations under other statutes. Whether a
24 security interest is a "purchase-money security interest" under
25 other law is determined by that law. For example, decisions
26 under Bankruptcy Code section 522(f) have applied both the
dual-status and the transformation rules. The Bankruptcy Code
does not expressly adopt the state law definition of "purchase-
money security interest." Where federal law does not defer to
this Article, this Article does not, and could not, determine a
question of federal law.

(continued...)

1 I can appreciate the irony in developing federal common law to
2 interpret a state law code term to aid in the interpretation of a federal
3 law code provision. However, I find it inappropriate to do so. I join
4 with most other courts that have considered the issue and look to state
5 law to determine whether DaimlerChrysler holds a PMSI. See, e.g., Trejos
6 v. VW Credit, Inc. (In re Trejos), 374 B.R. 210, 215 (9th Cir. BAP 2007);
7 In re Lavigne, No. 07-30192, 2007 WL 3469454 at *5 (Bankr. E.D. Va.
8 Nov. 14, 2007); In re Pajot, 371 B.R. 139, 147 (Bankr. E.D. Va. 2007).

9 Under Oregon's version of the UCC, DaimlerChrysler's security
10 interest is a PMSI "to the extent" the Vehicle is "purchase-money
11 collateral with respect to that security interest." O.R.S.
12 § 79.0103(2)(a). The Vehicle constitutes "purchase money collateral" if
13 it represents "goods or software that secures a purchase-money obligation
14 incurred with respect to that collateral." O.R.S. § 79.0103(1)(a). In
15 order for DaimlerChrysler to have a PMSI as a result of financing
16 negative equity, the negative equity must be a purchase money obligation
17 incurred with respect to the Vehicle. Oregon law defines a purchase
18 money obligation to be an "obligation of an obligor incurred as all or
19 part of the price of the collateral or for value given to enable the
20 debtor to acquire rights in or the use of the collateral if the value is
21 in fact so used." O.R.S. § 79.0103(1)(b).

22 ///

23 ///

24 _____
25 ⁶(...continued)
26 (emphasis in original).

1 C. DaimlerChrysler's Finance of Negative Equity Does Not Constitute a
2 Purchase Money Obligation.

3 O.R.S. § 79.0103(1)(b) imposes an alternative test for a
4 purchase money obligation: the debt must have been incurred as "all or
5 part of the price of the collateral," or it must have been incurred "for
6 value given to enable the debtor to acquire rights in or the use of the
7 collateral if the value is in fact so used."

8
9 1. Price of the collateral.

10 Courts have reached different conclusions on whether the "price
11 of the collateral" includes negative equity. "The case law grappling
12 with this issue has reached opposite conclusions, when trying to decide
13 whether the term ["price of the collateral"] could include the negative
14 equity paid off by part of the loan." In re Sanders, No. 07-50783-C,
15 2007 WL 3047233 (Bankr. W.D. Tex. Oct. 18, 2007).

16 Courts that have held that financing extended to cover negative
17 equity constitutes part of the "price of the collateral" rely primarily
18 on Official Comment 3 to § 9-103 of the UCC ("Official Comment 3"), or on
19 the doctrine of in pari materia⁷ to conflate the definition of cash sale
20 price contained in state automobile sales and finance laws with the term
21 "price of the collateral" in UCC § 9-103, or both.

22 Although the term "price" is not defined in the UCC, Official
23 Comment 3 provides some guidance as to its meaning. Official Comment 3
24

25 ⁷Statutes in pari materia are to be construed together, as dealing
26 with the same subject matter.

1 provides:

2 [T]he "price" of collateral or the "value given to enable"
3 includes obligations for expenses incurred in connection with
4 acquiring rights in the collateral, sales taxes, duties,
5 finance charges, interest, freight charges, costs of storage in
transit, demurrage, administrative charges, expenses of
collection and enforcement, attorney's fees, and other similar
obligations.

6 In analyzing "price of the collateral" in light of Official Comment 3,
7 one court has stated that "it is not apparent why a refinancing of
8 rolled-in negative equity on a trade-in as part of a motor vehicle sale
9 could not constitute an 'expense incurred in connection with acquiring
10 rights in' the new vehicle." GMAC v. Peaslee (In re Peaslee), 373 B.R.
11 252, 259 (W.D.N.Y. 2007) ("Peaslee II"). The court continues: "If the
12 buyer and seller agree to include the payoff of the outstanding balance
13 on the trade-in as an integral part of their transaction for the sale of
14 the new vehicle, it is difficult to see how that could not be viewed as
15 such an expense." Id. (emphasis in original).

16 Official Comment 3 further requires that for a PMSI to arise,
17 there must be a "close nexus between the acquisition of the collateral
18 and the secured obligation." Some courts have found this close nexus in
19 the financing of negative equity because the parties have agreed to a
20 "package transaction."

21 The trade-in of the vehicle was an integral part of the sales
22 transaction. The value of that trade-in along with its
23 accompanying debt affected the ultimate price that was paid for
24 the new pick-up truck. The negative equity is inextricably
25 intertwined with the sales transaction and the financing of the
purchase. This close nexus between the negative equity and
this package transaction supports the conclusion that negative
equity must be considered as part of the price of the
collateral.

26 Graupner v. Nuvel Credit Corp. (In re Graupner), Case No. 4:07-CV-37CDL,

1 2007 WL 1858291 at *2 (M.D. Ga. June 26, 2007).

2 Further, some courts which have found that the price of a
3 vehicle includes financed negative equity rely on the doctrine of in pari
4 materia to incorporate the definition of "cash sale price" from state
5 automobile sales and finance laws. In some states, the definition of
6 "cash sale price" explicitly includes negative equity financed as part of
7 the sale transaction. See Peaslee II, 373 B.R. at 260 (under New York's
8 Motor Vehicle Retail Installment Sales Act, the "cash sale price . . .
9 may include the unpaid balance of any amount financed under an
10 outstanding motor vehicle loan agreement . . ."); Graupner, 2007 WL
11 1858291 at *2 n.1 (under the Georgia Motor Vehicle Sales Finance Act,
12 cash sales price includes negative equity); In re Petrocci, 370 B.R. 489,
13 501 (Bankr. N.D.N.Y. 2007)(the term "price" as used in New York's UCC
14 § 9-103 must be given the meaning set forth in the New York Motor Vehicle
15 Retail Installment Sales Act's definition of "cash sales price," which
16 includes negative equity).

17 Other courts, using various arguments directly contrasting with
18 the analyses discussed above, hold that negative equity is not a
19 component of the "price of the collateral".

20 One line of reasoning refutes the idea that negative equity
21 constitutes one of the "expenses incurred in connection with acquiring
22 rights in the collateral" contemplated by Official Comment 3. See, e.g.,
23 In re Pajot, 371 B.R. at 149-50 (list of expenses to be included in the
24 price of the collateral as set forth in Official Comment 3 does not
25 contemplate the inclusion of negative equity); In re Price, 363 B.R. 734,
26 741 (Bankr. E.D.N.C. 2007)(advances to pay off balance of debt on vehicle

1 that was traded in are not part of the purchase price; they are
2 "significantly and qualitatively different from the fees, freight
3 charges, storage costs, taxes, and similar expenses that are typically
4 part of an automobile sale.").

5 A second line of reasoning disagrees that inclusion of negative
6 equity in a single package financing agreement constitutes a sufficient
7 nexus between the acquisition of the collateral and the secured
8 obligation to transform negative equity into part of the price of the
9 vehicle financed. Rather, in that circumstance, there are simply "two
10 separate financial transactions memorialized on a single retail
11 installment contract document. . . ." In re Price, 363 B.R. at 741-42;
12 see also In re Mitchell, No. 07-02913, 2007 WL 3378229 (Bankr. M.D. Tenn.
13 Nov. 13, 2007); Citifinancial Auto v. Hernandez-Simpson (In re Hernandez-
14 Simpson), 369 B.R. 36 (D. Kan. 2007).

15 Those courts which refuse to use in pari materia to incorporate
16 a definition of "cash sale price" from state automobile sales and finance
17 laws do so for several reasons.

18 First, some courts hold that because the term "price of the
19 collateral" is not ambiguous, in pari materia, a doctrine of statutory
20 interpretation, is not available to incorporate definitions of "cash sale
21 price" under state automobile sales and finance laws. See In re
22 Blakeslee, No. 07-1019-3F3, 2007 WL 3133937 (Bankr. M.D. Fla. Sept. 19,
23 2007)(term "price of the collateral" in Florida's version of UCC § 9-103
24 is clear on its face; it "has the same meaning that it has always had in
25 connection with transactions for the acquisition of any collateral,
26 including a motor vehicle, which is the actual price of the collateral

1 being acquired.")(quoting In re Peaslee, 358 B.R. 545, 556 (Bankr.
2 W.D.N.Y. 2006)("Peaslee I"), rev'd, Peaslee II, 373 B.R. 252 (W.D.N.Y.
3 2007)); In re Acaya, 369 B.R. 564, 570 (Bankr. N.D. Cal. 2007)(concluding
4 that financing used to pay negative equity does not constitute part of
5 the price of the collateral as contemplated by UCC § 9-103; "[t]here is
6 no indication in the [California Automobile Sales Finance Act or its
7 legislative history] that . . . "cash price" was intended to effect a
8 departure from the traditional understanding of a purchase money security
9 interest.").

10 Other courts decline to use the in pari materia doctrine to
11 graft the definition of "cash sale price" from state automobile sales and
12 finance laws onto the term "price of the collateral" as used in the
13 definition of a purchase money obligation under the UCC because the two
14 statutes do not relate to the same subject matter or do not have the same
15 purpose. See, e.g., In re Lavigne, 2007 WL 3469454 at *7.

16 At least one court has applied in pari materia to conclude that
17 negative equity is not part of the "price of the collateral" because the
18 state automobile sales and finance law definition of "cash sale price"
19 does not expressly include negative equity. In re Conyers, No. 07-50855,
20 2007 WL 3244106 at *4-5 (Bankr. M.D.N.C. Nov. 2, 2007).

21 In another vein, one court advocates a "straightforward,"
22 contextual reading of the phrase "price of the collateral" within the
23 UCC, and rejects the proposition that "price of the collateral" includes
24 negative equity.

25 Context thus bolsters the conclusion that "price of the
26 collateral" need not be given some exotic meaning or treated as
some peculiar argot to sweep up more than the common

1 understanding of the phrase is intended to convey. One may
2 borrow money to buy something (e.g., a new vehicle), and also
3 borrow additional money for some other purpose (e.g., to pay
4 off the balance of a loan for the trade-in vehicle). The part
5 used to buy something is purchase money obligation. The part
6 used for some other purpose is not. We can tell what part was
7 used to buy something by simply looking at the price of the
8 thing purchased.

9 In re Sanders, 2007 WL 3047233 at *12.

10 I agree that "price of the collateral" does not include negative
11 equity. Negative equity is not similar in nature or scope to the other
12 "expenses incurred in connection with acquiring rights in the collateral"
13 contemplated by Official Comment 3. More importantly, I agree with the
14 Lavigne court that the liability for negative equity is not an expense
15 "incurred in connection with acquiring" the Vehicle; it is an antecedent
16 debt.

17 That liability necessarily preceded the acquisition. The pre-
18 existing indebtedness was simply rolled into the new car loan.
19 As the court observed in Pajot, "the substance of the
20 transaction, although instantaneous, is that the second
21 creditor is paying off the debtor's unsecured deficiency debt
22 on the first vehicle." Pajot, 371 B.R. at 154.

23 Lavigne, 2007 WL 3469454 at *8.

24 DaimlerChrysler requests that I utilize the doctrine of in pari
25 materia to incorporate into the UCC term "price of the collateral" the
26 definition of "cash sale price" from Oregon's automobile sales and
finance law, found at O.R.S. § 83.510(1). Doing so, however, does not
advance DaimlerChrysler's argument.

O.R.S. § 83.510(1) provides:

"Cash sale price" means the price for which the motor vehicle
dealer would sell to the buyer, and the buyer would buy from
the motor vehicle dealer, the motor vehicle that is covered by

1 the retail installment contract, if the sale were a sale for
2 cash instead of a retail installment sale. The cash sale price
3 may include any taxes, registration, license and other fees and
4 charges for accessories and their installation and for
delivering, servicing, repairing or improving the motor
vehicle.

5 This definition of "cash sale price" does not explicitly include negative
6 equity, as do similar statutes in New York, Georgia, and California.
7 Nevertheless, DaimlerChrysler asserts that the omission is immaterial,
8 because the list of additional items O.R.S. § 83.510(1) says may be
9 included in the cash sale price does not exclude negative equity.

10 DaimlerChrysler's reasoning fails for two reasons. First,
11 because the "cash sale price" is the price the Johnsons would have paid
12 the Dealer in a cash transaction, it logically cannot include negative
13 equity. The Johnsons never would have paid the amount of the negative
14 equity to the Dealer in an all cash transaction; instead, they would have
15 paid the lender which financed the Trade-In directly.

16 Second, automobile finance transactions are subject to
17 Regulation Z of the Federal Reserve Board, which, beginning in 1998,
18 added disclosure requirements concerning the financing of negative
19 equity. Thereafter, numerous states, including Oregon, enacted
20 legislation to address negative equity disclosures at the state level.
21 See Kenneth J. Rojc & Thomas K. Juffernbruch, Negative Equity in Trade-In
22 Vehicles: Regulation Z and State Law Developments, 55 Bus. Law. 1295
23 (2000). Oregon's version of Regulation Z is contained in the Oregon
24 Motor Vehicle Retail Installment Sales Act, 1999 Or. Laws 525, codified
25 at O.R.S. § 83.520(3)(d), which mandates the form and content of a motor
26 vehicle retail installment contract in Oregon, and specifically requires

1 that any amount "actually paid or to be paid by the motor vehicle dealer
2 pursuant to an agreement with the buyer to discharge a security interest,
3 lien or lease interest on property traded in" is to be listed separately
4 from the "cash sale price of the motor vehicle which is the subject
5 matter of the retail installment contract." Compare O.R.S.

6 § 83.520(3)(a) with O.R.S. § 83.520(3)(d). If anything, O.R.S. § 83.520
7 indicates that negative equity is not a part of the "cash sale price" of
8 the Vehicle.

9 The doctrine of in pari materia is available for interpretation
10 of Oregon statutes.

11 In interpreting a statute, our task is to discern what the
12 legislature intended. That inquiry begins with the text of the
13 statutory provision itself, because the text is the best
14 evidence of the legislature's intent. Also pertinent at that
15 first level of analysis is the context of the statute under
16 consideration. Context includes other related statutes.

17 State v. Carr, 877 P.2d 1192, 1194 (Or. 1994) (en banc).

18 I find that in the context of deciding whether under Oregon law,
19 negative equity can be part of the "price of the collateral" and
20 therefore a purchase money obligation with respect to a consumer's
21 purchase of a vehicle, the legislative intent can be gleaned from the
22 text and context of the Oregon Motor Vehicle Retail Installment Sales
23 Act. Accordingly, I find it appropriate, under the doctrine of in pari
24 materia, to use O.R.S. §§ 83.510(a) and 83.520(3) as aids in determining
25 what constitutes "price of the collateral" for purposes of O.R.S.
26 § 79.0103(1)(b).

For the reasons stated above, I conclude that negative equity
does not constitute part of the purchase price of the Vehicle under

Oregon law.

2. Value given to enable debtor to acquire rights in the collateral

A purchase money obligation also can arise based on "value given to enable the debtor to acquire rights in or the use of the collateral if the value is in fact so used."⁸ O.R.S. § 79.0103(1)(b). Not surprisingly, there is considerable overlap in the analyses courts have used in interpreting the phrase "value given to enable the debtor to acquire rights in or the use of the collateral if the value is in fact so used" and in determining the meaning of "price of the collateral." That overlap principally occurs in the application of Official Comment 3.

For instance, many courts evaluate the Official Comment 3 phrase "value given to enable" to determine whether negative equity can be considered an expense "incurred in connection with acquiring rights in the collateral."

The Sanders court ruled that financed negative equity was not value given to enable debtors to acquire rights in a vehicle because it did not represent an obligation for an expense incurred in acquiring

⁸While a purchase money obligation based on "price of the collateral" and a purchase money obligation based on "value given to enable the debtor to acquire rights in or the use of the collateral" both give rise to a PMSI, the UCC recognizes a greater need to protect the PMSI which is based on the "price of the collateral" than the PMSI based on the enabling loan. See O.R.S. § 79.0324(7) ("A security interest securing an obligation incurred as all or part of the price of the collateral has priority over a security interest securing an obligation incurred for value given to enable the debtor to acquire rights in or the use of collateral."), and Official Comment 13 thereto.

rights in the collateral. In re Sanders, 2007 WL 3047233 at *13.

The [expense] items listed [in Official Comment 3] are closely connected with the purchase of the vehicle itself - compensating the seller for the cost of delivering the vehicle, repaying the seller for sales taxes realized from the sale of the vehicle, paying for such administrative charges as title costs and license fees associated with transferring ownership of the vehicle from seller to buyer, and the like. In addition, the list includes costs normally associated with the enforcement of the security interest once granted. . . .

Id. See also In re Conyers, 2007 WL 3244106 at *5 (payment of preexisting debt is not similar to other enumerated items); In re Pajot, 371 B.R. at 152 (that negative equity payoff is neither necessary nor compelled "cuts against" its inclusion with the list of expenses contained in Official Comment 3).

Given that financing negative equity is increasingly common, it was not an oversight that the legislature did not include negative equity in the list of "expenses incurred in connection with acquiring rights in the collateral" set forth in Official Comment 3. In re Blakeslee, 2007 WL 3133937 at *3. Further, negative equity is not of the same "type" or "magnitude" as the expenses listed in Official Comment 3. Id.

There is greater division among courts on the question of whether "value given" in the form of financing negative equity creates a close nexus with the acquisition of collateral.

Some courts have found the requisite close nexus based on the package transaction itself. For instance, in finding that "[t]he phrase, 'value given to enable the debtor to acquire rights in' purchase money collateral is broad enough to include the 'negative equity' financed by a lender," the court in In re Cohrs found the required "close nexus" between the acquisition of the property and the secured obligation

1 existed where the financed negative equity was "part of a single
2 transaction and all components of the obligation incurred [were] for the
3 purpose of acquiring the property securing the new obligation." In re
4 Cohrs, 373 B.R. 107, 110 (Bankr. E.D. Ca. 2007). See also In re Brei,
5 No. 4:07-BK-01354-JMM, 2007 WL 4104884 at *1 (Bankr. D. Ariz. Nov. 14,
6 2007)(deciding, without analysis, that "the entire amount which was lent
7 was for the purpose of acquiring a vehicle, regardless of whether some
8 portion thereof was used to pay off a previous lien on the trade-in.");
9 In re Petrocci, 370 B.R. at 499 (negative equity constitutes "value given
10 to enable the debtor to acquire rights in the collateral" where
11 "[n]egative equity financing is inextricably linked to the financing of
12 the new car. It is clear that one would not take place without the
13 other.").

14 Other courts have determined that negative equity financing does
15 not provide the direct assistance for purchasing a vehicle that the
16 standard "for value given to enable the debtor to acquire rights in . . .
17 the collateral" requires. For example, the Sanders court recognized a
18 distinction between facilitating a transaction and enabling a debtor to
19 acquire rights in a new vehicle. "The fair implication of this
20 [condition that the value given be 'in fact so used'] is that the value
21 must be used to acquire *rights* in the collateral, as opposed to, for
22 example, *enabling the transaction* that ultimately results in the
23 borrowers acquiring rights in the collateral." Sanders, 2007 WL 3047233
24 at *14 (emphasis in original). In re Blakeslee, 2007 WL 3133937 at *3
25 (The court observed that it did not find "the requisite close nexus
26 between the payoff of negative equity and the acquisition of the new

1 vehicle."). See also In re Pajot, 371 B.R. at 154 (because the substance
2 of the transaction whereby negative equity is financed is that the second
3 creditor is paying off the debtor's unsecured deficiency debt on the
4 first vehicle, "it is not clear that there is a close nexus between the
5 negative equity payoff and the acquisition of the new vehicle.").

6 It is not enough that value be given to acquire rights in the
7 vehicle; the value given must be "in fact so used." Sanders, 2007 WL
8 3047233 at *14.

9 Still other courts look to the language "value given to enable"
10 in an effort to determine whether the finance of negative equity
11 qualifies as a purchase money obligation. Starting with the Black's Law
12 Dictionary definition of enable, the Conyers court concluded that the
13 financing of negative equity was not required for the debtor to purchase
14 a new vehicle. Rather, the loan of additional money was "a convenience
15 and an accommodation to the Debtor." In re Conyers, 2007 WL 3244106 at
16 *5.

17 The court in Acaya found the words "value given to enable the
18 debtor to acquire rights in or the use of the collateral if the value is
19 in fact so used" to be ambiguous in the context of the Hanging Paragraph.
20 In re Acaya, 369 B.R. at 569. Applying Matthews v. Transamerica Fin.
21 Servs. (In re Matthews), 724 F.2d 798 (9th Cir. 1984), which held that a
22 refinance destroyed the purchase money character of an obligation, as
23 part of its rationale, the Acaya court concluded that "the amount used to
24 pay the negative equity does not constitute . . . value given to acquire
25 rights in the collateral" In re Acaya, 369 B.R. at 570.

26 In Matthews, the Ninth Circuit addressed the character of an

1 enabling loan in deciding a motion to avoid a non-PMSI in debtor's
2 property under § 522 of the bankruptcy code. Matthews, 724 F.2d at 799-
3 801. While Matthews arises in the context of lien avoidance and predates
4 the enactment of Revised Article 9, it is nevertheless instructive for
5 this case. Prior UCC § 9-107 defined a PMSI as a security interest taken
6 by a person who "gives value to enable the debtor to acquire rights in or
7 use of collateral if such value is in fact so used." This is essentially
8 the same phrase as used in current O.R.S. § 79.0103(1)(b), except that in
9 the current version the article "the" is inserted before "collateral."
10 Matthews articulates that a refinance constitutes value to enable debtors
11 to pay off a loan, not to acquire rights in collateral. Speaking to the
12 apparent harshness of the loss of a PMSI through a refinance, the
13 Matthews court stated:

14 The argument that form should not be elevated over substance
15 has merit in some settings, but not here. We are dealing with
16 a statutory scheme that governs the priorities among creditors.
17 Purchase money security is an exceptional category in the
18 statutory scheme that affords priority to its holder over other
19 creditors, but only if the security is given for the precise
20 purpose as defined in the statute. And we should not lose
21 sight of the fact that the lender chooses the form.

19 Id. at 801.

20 In the matter before me, the financed negative equity is nothing
21 more than a refinance of the pre-existing debt owed on the Trade-In.
22 Accordingly, it does not create the requisite close nexus between "value
23 given" and the Johnsons' acquisition of rights in the Vehicle. I
24 previously have determined that financing of negative equity is not an
25 expense incurred as part of the "price of the collateral." Neither is it
26 value given and used to enable a debtor to acquire rights in the

1 collateral.

2
3 3. Financed negative equity is not a purchase money obligation.

4 Because financed negative equity is neither an obligation
5 incurred as "all or part of the price of the collateral" nor an
6 obligation incurred "for value given to enable the debtor to acquire
7 rights in or the use of the collateral if the value is in fact so used,"
8 for purposes of O.R.S. § 79.0103(1)(b), financed negative equity is not a
9 purchase money obligation.

10
11 D. Applicability of the Hanging Paragraph

12 Having determined that the financed negative equity portion of
13 DaimlerChrysler's Claim is not covered by a PMSI, I now must decide what
14 effect that determination has on treatment of the Claim under the Plan.

15 Most courts concluding that financed negative equity is not a
16 purchase money obligation then apply one or the other of two interpretive
17 rules, developed under state UCC law, for dealing with the secured
18 creditor's PMSI: the "transformation rule" or the "dual status rule."
19 "The 'transformation rule' provides that when a transaction contains both
20 purchase money and non-purchase money obligations, the entire transaction
21 is transformed into a non-purchase money obligation." In re Burt, No.
22 07-23193, 2007 WL 4087071 n.34 (Bankr. D. Utah Oct. 24, 2007). The dual
23 status rule "allows a security interest to have both the status of a
24 PMSI, to the extent that it is secured by collateral purchased with loan
25 proceeds, and the status of a general security interest, to the extent
26 that the collateral secures obligations unrelated to the purchase." In

1 re Petrocci, 370 B.R. at 504.

2 Those courts which have applied the transformation rule
3 generally hold that the Hanging Paragraph does not afford any protection
4 against cramdown of the secured creditor's claim. See In re Blakeslee,
5 2007 WL 3133937 at *5 (court is unwilling to "unwind the manipulations"
6 applying the dual status rule would require of it); In re Price, 363 B.R.
7 at 746 ("[G]enerally when negative equity is involved, the appropriate
8 rule is the transformation rule.").

9 Those courts which have applied the dual status rule have
10 allowed protection against cramdown under the Hanging Paragraph only for
11 the portion of the secured creditor's claim that is a purchase money
12 obligation. See Hernandez-Simpson, 369 B.R. at 46 (under Kansas law,
13 dual status rule applies even to consumer transactions); In re Lavigne,
14 2007 WL 3469454 at *1 n.1 (adopting dual status rule unless a negative
15 equity transaction is "structured such as to obfuscate transaction
16 details or otherwise abuse the dual status rule," in which case the court
17 would "not hesitate to discretionarily apply the more stringent
18 transformation rule"); In re Conyers, 2007 WL 3244106 at *6 (applying
19 dual status rule preserves congressional intent in enacting the Hanging
20 Paragraph); In re Hayes, 376 B.R. 655, 676 (Bankr. M.D. Tenn.
21 2007)(applying dual status rule such that a secured creditor holds a PMSI
22 "within the scope of the hanging sentence to the extent of its claim less
23 . . . the payoff of negative equity. . . ."); Westfall II, 376 B.R. 210
24 (applying dual status rule, but not as a matter of state law); In re
25 Honcoop, No. 07-1358, 2007 WL 3133936 (Bankr. M.D. Fla. Sept. 19,
26 2007)(in a case finding that GAP insurance was not purchase money

1 obligation, court applied dual status rule to reduce secured claim by
2 amount of non-purchase money obligation; balance of secured claim was not
3 subject to bifurcation under the Hanging Paragraph); In re Pajot, 371
4 B.R. at 163 (applying dual status rule, but "not without reservation");
5 In re Acaya, 369 B.R. at 571 (applying dual status rule; finding no
6 impediment to easy allocation of prepetition payments given traceability
7 resulting from compliance with California's automobile sales and finance
8 laws).

9 Two recent decisions have turned immediately from the analysis
10 of whether the secured creditor has a purchase money obligation based on
11 financing negative equity to application of the Hanging Paragraph,
12 without first determining the impact of the secured creditor's non-
13 purchase money obligation under state law. In re Mitchell, 2007 WL
14 3378229 at *5; In re Sanders, 2007 WL 3047233 at *17-18. The Mitchell
15 and Sanders courts focused on the phrase "if the creditor has a purchase
16 money security interest securing the debt that is the subject of the
17 claim." Their reasoning is that Congress' use of the conditional "if"
18 rather than more flexible language such as "to the extent," coupled with
19 the omission of any quantifying modifier to the word debt, e.g. "part of"
20 the debt, requires an absolute result, mandating application of the
21 transformation rule rather than the dual status rule.⁹

22 In yet another analytical variation, the Westfall II court
23

24 ⁹But see In re Hayes, 376 B.R. 655, 676 (Bankr. M.D. Tenn.
25 2007)("The hanging sentence mixes state and federal legal principles in
26 the complicated manner discussed above. Overlaying a federal
transformation rule produces a wobbly three-legged stool anchored by no
obvious congressional policy choice in this context.").

1 utilized the "excluded purpose" doctrine¹⁰ of federal statutory
2 interpretation in concluding that it was not appropriate to look to state
3 law to ascertain whether the transformation rule or the dual status rule
4 should apply to determine the impact on a PMSI when part of the subject
5 debt is not a purchase money obligation. Westfall II, 376 B.R. at 216-
6 17. In reaching this conclusion, the Westfall II court observed, as
7 noted above, that Official Comment 8 expressly provides that the state
8 law definition of PMSI was not meant to apply to bankruptcy law. Without
9 analyzing the language of the Hanging Paragraph, the court "adopted" the
10 dual status rule because "[s]imply, application of the transformation
11 rule is too severe." Id. at 219.

12 I now turn to the task of applying these concepts to the matter
13 before me.

14 Oregon's Revised Article 9¹¹ adopted the dual status rule for
15 non-consumer transactions, so that even if purchase money collateral also
16 secures an obligation that is not a purchase money obligation, the PMSI
17 does not lose its status as such for any portion of the debt. O.R.S.
18 § 79.0103(6)(a). Oregon's dual status rule has broader implications
19 however, because it provides, again in non-consumer transactions, that a
20 PMSI does not lose its status even if the purchase money obligation is

21
22 ¹⁰"Excluded purpose means that a state statute should not serve as a
23 federal rule of decision if the federal purpose was excluded from the
24 state law. That is the case in the state law definition of purchase
25 money." Westfall II, 376 B.R. at 216.

26 ¹¹For a discussion of the transformation rule and the dual status
rule under former Article 9 and Revised Article 9, see Keith G. Meyer, A
Primer on Purchase Money Security Interests Under Revised Article 9 of
the Uniform Commercial Code, 50 U. Kan. L. Rev. 143, 155-161 (2001).

1 renewed, refinanced, consolidated, or restructured. Id. Whether to
2 apply the dual status rule in consumer transactions is left to the
3 discretion of the courts without further guidance from the statute.

4 The limitation of the rules . . . of this section to
5 transactions other than consumer-goods transactions is intended
6 to leave to the court the determination of the proper rules in
7 consumer-goods transactions. The court may not infer from that
8 limitation the nature of the proper rule in consumer-goods
9 transactions and may continue to apply established approaches.

10 O.R.S. § 79.0103(8).

11 In light of that discretion, I return to the language of the
12 Hanging Paragraph to examine it in context in the Bankruptcy Code, as
13 modified by BAPCPA. That is appropriate because in interpreting the
14 language of a code provision, it is essential to consider "the language
15 itself, the specific context in which that language is used, and the
16 broader context of the statute as a whole." Robinson v. Shell Oil Co.
17 519 U.S. 337, 341 (1997). Statutory interpretation is a "holistic
18 endeavor." United Sav. Ass'n of Texas v. Timbers of Inwood, 484 U.S.
19 365, 371 (1988). If the interpretation of statutory language is not
20 clear from the plain meaning of the words used, the statute's context
21 within the overall statutory framework should be examined, with
22 appropriate consideration of the legislative history. Davis v. Michigan
23 Dept. of Treasury, 489 U.S. 803, 809 (1989) ("[S]tatutory language cannot
24 be construed in a vacuum. It is a fundamental canon of statutory
25 construction that the words of a statute must be read in their context
26 and with a view to their place in the overall statutory scheme.")
(citation omitted).

With those principles in mind, the relevant language of the

1 Hanging Paragraph is "[f]or purposes of paragraph [1325(a)](5), section
2 506 shall not apply to a claim described in that paragraph if the
3 creditor has a purchase money security interest securing the debt that is
4 the subject of the claim. . . ." (emphasis added). Congress did not
5 state specifically that the Hanging Paragraph applied to a claim or debt
6 "or any part or portion" of either. Neither did Congress specify that
7 the Hanging Paragraph could be applied only to the "entire" claim or
8 debt. I do not find the "plain language" of the Hanging Paragraph
9 dispositive as to whether the "dual status" or the "transformation" rule
10 should apply in this instance.

11 However, from the language of the Hanging Paragraph itself and
12 its limited legislative history,¹² it is clear that the Hanging Paragraph
13 was designed to combat a particular perceived abuse by debtors in chapter
14 13: purchasing a car shortly before a chapter 13 bankruptcy filing and
15 taking advantage of the substantial depreciation that occurs immediately
16 when a new car is driven off the lot to cram down the secured creditor's
17 collateral interest.

18 Prior to BAPCPA, vehicle financiers could be harmed by a debtor
19 who acquired a vehicle in the months leading up to bankruptcy,
20 then filed bankruptcy and crammed the creditor's claim down to
21 the collateral value on the date of filing. Due to the rapid
22 depreciation of motor vehicles the moment they leave the
23 dealer's lot, debtors could often reap a benefit by cramming
24 down the debt, only paying a secured claim equal to the
25 depreciated value of the car...In enacting the hanging
26 paragraph, Congress fixed this disparity to ensure that debtors
could not load up on vehicle-secured debt pre-petition only to
cram it down to the collateral value in bankruptcy.

25 ¹²For an exhaustive review of the legislative history of the Hanging
26 Paragraph, see the Addendum to Judge Lundin's decision in In re Hayes,
376 B.R. at 676-684.

1 In re Pajot, 371 B.R. at 159. See In re Lavigne, 2007 WL 3469454 at *11.

2 In light of that clear purpose behind the Hanging Paragraph, it
3 does not make sense to apply the transformation rule and deprive the
4 creditor of the benefit under BAPCPA of its vehicle PMSI entirely because
5 the creditor has financed some negative equity in its transaction with
6 the debtor. I find that applying the dual purpose rule is more
7 consistent with congressional intent, as reflected in the Hanging
8 Paragraph. Accordingly, I find that § 506 does not apply to the portion
9 of the Claim that is not a debt for negative equity financing, and
10 cramdown does not apply to that portion of DaimlerChrysler's Claim. I
11 will sustain Daimler Chrysler's objection to the Plan in part, and I will
12 deny confirmation of the Plan and enter a 28-day order for the Johnsons
13 to file a modified plan.

14

15 CONCLUSION

16 Financed negative equity is neither part of the "price of the
17 collateral" being purchased, nor is it "value given to enable the debtor
18 to acquire rights in or the use of the collateral" being purchased. It
19 must be one or the other in order to be a purchase money obligation under
20 O.R.S. § 79.0103(1)(b). Because a debt must be a purchase money
21 obligation in order to give rise to a PMSI, a security interest based on
22 debt arising from financed negative equity, paying off antecedent debt,
23 cannot be a PMSI. However, applying the "dual status" rule, as allowed
24 in the court's discretion under O.R.S. § 79.0103(8) and consistent with
25 the language and intent behind Congress's adoption of the Hanging
26 Paragraph, I hold that the protection of the Hanging Paragraph against

1 cramdown applies to the PMSI portion of DaimlerChrysler's Claim and
2 sustain DaimlerChrysler's objection to the Johnsons' Plan, in part. I
3 will deny confirmation of the Plan and enter a 28-day order for the
4 filing of a modified chapter 13 plan by the Johnsons.
